DevOps engineer. 17 years of experience, close to thirteen of them in IT consultancies, at Atos then Capgemini, on assignments at EDF, Pôle Emploi and URSSAF among others. EDF is where I grew the most on the DevOps side, with Linux, Ansible and Kubernetes through OpenShift in production. Before that, I worked as a Java and PHP developer.

CKA and CKAD certified, I containerise, I automate and I help teams become self-sufficient. Claude Code is now part of my daily work on my projects, notably for development, Ansible roles and Terraform files.

Based in Guadeloupe.
