

XAVIER GUERET

DevOps Engineer | Automatisations & Cloud-Native | Kubernetes & IaC Practitioner

Email: xavier.gueret@gmail.com | Mobile: +590 6 12 92 51 22 | Location: Guadeloupe, French West Indies

PROFESSIONAL PROFILE

DevOps Engineer in progression, with a background in Java development and solid experience in automation and continuous integration. I have transitioned into DevOps through managing Linux environments, deploying applications on OpenShift and Kubernetes, and building reproducible infrastructures using Ansible and Terraform. I particularly enjoy designing stable, well-documented, and maintainable environments, and I am continuously expanding my skills in containerization, CI/CD, and Cloud-Native practices. Certified Kubernetes Administrator (CKA), Terraform Associate, and Red Hat Automation Specialist, I am looking for a technically stimulating environment that encourages growth, knowledge sharing, and best practices.

TECHNICAL SKILLS

DevOps & Orchestration

Kubernetes, OpenShift, Docker, Podman, Docker Compose, Ansible, Terraform, GitLab CI, Git, Git Flow, GitHub, GitLab, VSCode

Development

Java, Spring Boot, Spring Batch, Spring Cloud Task, Python, Perl, PHP

Infrastructure & Virtualization

Linux, Scibian, Proxmox, KVM, VirtualBox, Windows

Databases

PostgreSQL, MySQL, Oracle

Messaging & Streaming

Apache Kafka, RabbitMQ

Tools & Methodologies

Jenkins, Sonar, Jira, Confluence, Kustomize, Helm, IntelliJ, JFrog Artifactory, Grafana, Prometheus, Agile

PROFESSIONAL CERTIFICATIONS

- ✓ **Certified Kubernetes Administrator (CKA)** - 2023
- ✓ **Certified Terraform Associate** - HashiCorp - 2023
- ✓ **Red Hat Delivery Specialist - Automation (Ansible)** - 2022

PROFESSIONAL EXPERIENCE

● DevOps Engineer

EDF via CAPGEMINI - Scientific Workstation Team - Scibian Linux Distribution

2022 - July 2024

- Deployed and configured OpenQA for automated Scibian Linux qualification
- Created and maintained Ansible roles to automate application deployments
- Industrialized GitLab CI pipelines, reducing deployment time by 40%
- Debian/Scibian packaging and technical documentation on Confluence

Stack: Scibian Linux, OpenQA, Perl, Python, Ansible, OpenShift, Kubernetes, Kustomize, Helm, Podman, GitLab CI, Jira

● Java Developer - Tanzu Application Services Expert

Pôle Emploi via ATOS - TMJ Team

2020 - 2022

- Technical support and guidance on the Tanzu Application Services platform
- Development of Spring Boot microservices & Spring Batch jobs
- Implementation of Concourse CI/CD pipelines and test automation
- Improved application stability, reduced recurring incidents by 30%

Stack: Java 8/11, Spring Boot, Cloud Foundry, Concourse, GitLab, Kafka, RabbitMQ, Prometheus, Grafana

● Java Developer

CIRTIL Mission via ATOS

2016 - 2019

- Development of performant and robust Spring Batch jobs
- Processing optimization, reduced execution times by 25%

Stack: Java 8, Spring Batch, PostgreSQL, Jenkins, Sonar

Specialized PHP Developer

CIRTIL Mission via ATOS

2013 - 2016

- Development of REST/SOAP web services and dynamic web interfaces
- PHP script optimization for 20% performance gain

Stack: PHP 5, PostgreSQL, HTML5, CSS3, JavaScript

Technical Expert CRM Selligent

SmartBox via ATOS

2012 - 2013

- Implementation of CRM evolutions and Selligent web services integration
- Workflow and internal automation optimization

Stack: Selligent 7.5/8.0, Oracle 10g/11g, Windows Server

EDUCATION

Master's Degree in Computer Science

University of the French West Indies and Guiana - Fouillole Campus

2003

Professional Training

- **2020:** Red Hat - Ansible
- **2020:** Spring Boot - Sparks Training
- **2016:** Spring Framework 4 - ORSYS
- **2016:** Java EE 7 - ORSYS
